I.O.O.F. Install Officers

I.O.O.F. INSTALL OFFICERS
K. F. Brown, D.D.G.P., assisted by R. W. Russell, P.D.D.G.P., R. J. E. Gardner and C. Cowan, installed into office on Monday evening last, the officers of Macleod Encampment No. 16, I.O.O.F. The officers installed are as follows:—
P.C.P.—F. Timick.
C.P.—W. Shield.
H.P.—W. G. Andrews.
S. W.—R. W. Stewart.
J.W.—J. K. Ridley.
R.S.—R. W. Russell, P.C.P.
P.S.—C. Cowan.
Treasurer—W. Whitworth.
Guide—R. J. E. Gardner.
L.S.—H. P. Hart.
O.S.—George Bell.
1st W.—G. L. Pollard.
2nd W.—J. Hartley.
3rd W.—H. C. Lewis.
4th W.—W. T. Fleming.
1st G. of T.—H. L. Maitby.
2nd G. of T.—George Bell.

R. J. E. Gardner, special D.D.G. Master, assisted by P.G.M. E. F. Brown as D.D.G. Marshall, P.G. R. W. Stewart as D.D.G. Warden, P.G. Wesley Shield as D.D.G. Secretary, P.G. W. G. Andrews as D.D.G. Chaplain, and P.G. David Carson as D.D.G. Guardian, installed into office at the last regular meeting of Mountain View Lodge No. 4, the following officers for the ensuing term:

J.P.G.—G. L. Pollard.
N.G.—W. O. Hoodless.
V.G.—H. C. Lewis.
R.S.—R. W. Russell.
P.S.—R. W. Stewart.
Treasurer—W. Shield.
Warden—J. K. Ridley.
Conductor—H. L. Maitby.
Chaplain—J. Hartley.
I.G.—H. Bell.
O.G.—W. T. Fleming.
R.S.N.G.—D. Carse.
L.S.N.G.—J. Arthur.
R.S.V.G.—C. Chisholm.
L.S.V.G.—D. Grandison.
R.S.E.—J. Lochard.
L.S.E.—J. McNab.

At Mountain View Rebekah Lodge, No. 23, I.O.O.F., Macleod, on Tuesday evening, July 11th, Mrs. W. Shield, District Deputy President, assisted by the following: Deputy Grand Marshal, K. F. Brown, P.G.M.; Deputy Grand Warden, Sister Dunbar; Deputy Grand Chaplain, Bro. R. W. Smith; Deputy Grand Guardian, Bro. R. J. E. Gardner; Deputy Grand Secretary, Bro. J. Gillespie, attended and installed the following officers for the ensuing term:—

J.P.G.—Sister E. Brown.
N.G.—Sister A. Gillespie.
V.G.—Sister M. Hartley.
Rec. Sec.—Sister F. Nicholls.
Fin. Sec.—Bro. R. W. Smith.
R.S.N.G.—Sister J. Stewart.
L.S.N.G.—Sister Dunbar.
R.S.V.G.—Sister A. M. Wilson.
L.S.V.G.—Sister L. Lochard.
Warden—Sister E. Pollard.
Conductor—Sister E. Sutherland.
Chap.—Sister W. Pharo.
I.G.—Sister E. J. Gardner.
O.G.—Bro. J. Gillespie.
Treas.—Bro. E. F. Brown, P.G.M.
Short speeches were made by the D.D.P. Sister Shield and Bro. E. F. Brown, P.G.M., after which refreshments were served.

MOVING PRINTERS

Ocean Wanderers Who Know Their Job From A to Z

"Ship's printers," said an official of the London Society of Computers, are almost a class apart. "We have several among our members, and they have been sailing the seas the world over for many years."

"They are away for months together. Some, who join vessels which are making pleasure cruises of the world, do not see their homes for eight and nine months at a stretch. They have to know their craft from A to Z, for they are required to do everything in the printer's line—they set the type, make it up, and run it off on little hand machines."

In the great Atlantic liners like the Majestic and the Boreana several printers are carried, but in smaller passenger vessels one and at the most two are considered ample for the printing work of the ship. They have to print the daily menu, concert programmes, and any special notices which may be required and are responsible for the production of the daily news sheet when one is produced. The big liners keep one man fully employed on the latter work.

Some idea of the distances these moving printers travel can be gained from the fact that on one of their long journeys they have travelled 100,000 miles in a year, and during that time produced hundreds of thousands of menus and programmes. Generally the equipment is a case of 15 to 20 pounds of type, six or seven cases (the frames in which the type is placed for printing), and a hand machine. In the big ships small electric motors are fixed to the machines for running off the printing.

From the State of Indiana comes word of the marriage of William Nutt to Blanche Bell. As to that there is always more or less hard wear about all marriage propositions.

FISHIN' FINE

A ragged straw and overalls,
A bamboo rod and a hook and line,
An old tomato can of worms—
And all the joy in the world is mine.
For down the stream by the fallen tree
From the depths of the pool, a glimmer and shine
Have flashed a message and challenge
to me—
Come on, old boy, the fishin' fine!

The Time of Day To Put Out The Grasshopper Bait

(By J. R. Parker, of Bozeman, Mont.
Expert on Farm and Orchard Pest.)

The old idea of putting out poisoned bran mash was to scatter it in the late afternoon or evening or to get up and distribute it before sunrise in the morning.

The reasons advanced for putting it out at these times were (1) That after a hot summer day the grasshoppers were thirsty and would eat the moist mash for the moisture it contained just before they went to roost for the night; (2) That in the morning the hoppers are hungry after the night's fast and will, therefore, eat the bait readily at that time.

Experiments conducted during the past three years and practical experience gained in two big grasshopper campaigns show that late in the afternoon and very early in the morning are just about the poorest times to put out grasshopper bait. By actually watching 21,111 grasshoppers feed it

was found that no feeding takes place in the early morning hours, but that it generally begins between 8 and 9 a.m. increases rapidly between 9 and 10, and reaches its height between 10 and 12 falling off gradually during the afternoon, practically all feeding having stopped by 5 p.m., except in unusually warm weather.

Now, since the poisoned bran mash is more effective while it is moist and still retains its attractive odor, it seems reasonable to suppose that best results will be obtained if it is scattered at the time when the greatest number of grasshoppers are feeding. This has proved to be true in practical work and our biggest kills have been made when the bait was scattered in the morning between 9 and 12.

Under Montana conditions it has been found that bait scattered in the late afternoon or early morning hours may become dry before the grasshopper is ready to feed, and much of it is therefore wasted. Another point of considerable importance is that during the grasshopper season thunder storms in the late afternoon and evening are not uncommon and much poisoned bran mash has been rendered worthless by these sudden showers. If put out in the late morning on warm, bright days the bait will have served its purpose before weather conditions can interfere.

To county agents and all others directing grasshopper control work it is therefore recommended that the poisoned bran mash be scattered between 9 and 12 a.m. on warm, bright days. If large areas must be covered in a short time, spreading may begin at 8 a.m. and continue until 3 p.m. Do not scatter grasshopper bait during cool, cloudy weather or when it is extremely windy. A general rule to follow is to scatter it only when the grasshoppers are actively moving about.

"Miss Nell Davis gave a slumber party to some of her friends last Thursday—Oklahoma paper. Presumably that was one of the kind where the guests tucked in."

FARMER IS WINNER IN WHITFORD BY-ELECTION

Edmonton, July 11.—In the Whitford by-election today, Mike Chordoba, the U. F. A. candidate, defeated A. S. Shandro.

Another U. F. A. Winner, Edmonton, July 11.—Though only fragmentary returns have been received from the Ribstone by-election it is generally conceded here that the indications of the early returns are assurance of the election of W. G. Fargherson, U.F.A. over John J. McKenna.

DIES AT 134 SON AGED 7.

Greasy Creek, Ky., July 10.—"Uncle Johnny" Shelt, Kentucky's oldest citizen, said to have been 134 years old, died here yesterday of infirmities of age. Shelt, a mountaineer, was claimed by his relatives to have been the oldest man in the world. Among the many mourners at the funeral today were his two sons, William, aged 80, and Albert, seven. Albert is the offspring of a second marriage.

MAKING THE IRRIGATION FARM PAY

"The Best Farmer in Montana," is the title that was given by a writer in the "Country Gentleman" in 1919 to Mr. E. D. O'Donnell of Billings, Montana, who is to address the Irrigation Convention at Maple Creek, Saskatchewan, and Brooks, Alberta, July 20th, to July 25th, on "Making the Irrigation Farm Pay."

Mr. O'Donnell is perhaps best known in irrigation circles in the United States as the man who "humanized the Reclamation Service." In 1914 the Secretary of the Interior—the Hon. J. Franklin J. Lane—announced that his reallocation work in the state of Montana was to be discontinued. This aroused the people of the entire West, and especially of Montana, said the writer in the article referred to above, so they arranged for a hearing; and when Secretary Lane visited them O'Donnell explained what was wrong and suggested the proper remedy. The result of the conference was the formation of a Reclamation Commission, composed of five members. The commission was given complete charge of the maintenance and operation of all the various government irrigation projects scattered over seventeen Western States, and O'Donnell was made the head of the commission with the title of Supervisor of Irrigation.

"It was a red-letter day for the settlers on government irrigation projects when O'Donnell took hold of their problems. He straightened out all their difficulties and made it possible for them to succeed. He not only relieved their difficulties with regard to water and payments, but he worked with them and showed them just how to arrange their fields, how to handle the water, what crops to plant and how to market them. In short, he became a sort of national farm adviser, a task he was eminently qualified to perform, since he had had years of practical experience and was himself a successful irrigation farmer."

Mr. O'Donnell was born in a log cabin in the woods of Michigan a few miles out of Saginaw in 1860. There he lived with his parents and nine brothers and sisters until he was twenty-one years old. Forty years ago he came West to Montana getting work on a horse ranch owned by the Billings estate. Afterwards he was put in charge of the Billings place, a tract of several thousand acres, which he proceeded to farm on an extensive scale. The following year he undertook the management of the large irrigation system controlled by the Billings and placed it on a substantial basis. Much of the early construction work had been poorly done and he was compelled to do a great amount of rebuilding.

In 1902, he carried on all the negotiations which led up to the purchase of this system by a company of farmers, and after they were concluded he was elected president of the irrigation company, which position he has retained up to the present time. This irrigation system, which serves an area of 100,000 acres, is recognized even today as one of the very best in the entire West.

Mr. O'Donnell was the first to investigate sugar beet possibilities in Montana, discovering that sugar beet was not only grown well there, but they contained a higher percentage of sugar than beets grown in any other place. He forewent possibilities in other crops, however, for the farmers of his vicinity and for the city of Billings, and immediately proceeded to organize a company to erect a sugar beet factory.

"Contracts covering more than 8,000 acres were made with sugar beet raising sugar beets, and negotiations were entered into for the sale of the beets. About this time the Great Western Sugar Company, of Denver, began extending its plant to the west, and the company an offer for its plant, which was accepted."

Mr. O'Donnell was the first to make the formation of a sugar beet factory and the erection of a plant not only brought a valuable industry to the city of Billings, but it brought an immense value to the farmers of the immense vicinity. In an indirect way it is said to have proved to be one of the most lucrative ventures of the West.

It resulted in the building up of a new system of agriculture on his farm that the formation of a sugar beet factory in a splendid income every year. The farm consists of a square section of 400 acres. It lies on the first bench above the Yellowstone River, and water is delivered to the entire project of 100,000 acres of which it is a part by gravity. The soil is silty and rich in fine dark loam.

The whole section lies almost level except that there is a slight dip toward the south and west, enough to provide fall for the irrigation water. There was almost no leveling to do in the beginning, and the cost of the ditches was not so high as on many projects. It all lies ideally for irrigation. There is a railroad station within two miles of the farm, where the produce, including sugar beets, is loaded for export.

But though he himself is operating an irrigated farm of 400 acres, Mr. O'Donnell says that the men who have done best on irrigated land are those with small farms. Almost all the farms larger than a quarter section have failed.

"The problem of making money on large farms is one of business management, of handling men and of preventing waste. A farm of 400 acres is not a big one where dry-land farming is practised, nor a very large one where irrigation is practised, but under intensive methods of irrigation farming it ranks as a very large farm, requiring the most careful kind of management of crops, water, soil, the various methods employed and of marketing. In short, unless a farm of that sort is well looked after in all those particulars it is like any other highly specialized industry—a good place either to make money or to lose it."

Fortunately Mr. O'Donnell is a very superior farmer and has, therefore, been able to make it profitable. "The general kind of rotation is alfalfa three to six years, sugar beets three years, small grains one year, then back again to alfalfa. The man-

DOMINION EXPRESS MONEY ORDER

MINIMUM EXPENSE
MAXIMUM CONVENIENCE

use all goes on the best land, and in fact Mr. O'Donnell has built up the fertility of his farm beyond what even the most intensive farmers anywhere could make. For example, averages more than fifty bushels of wheat to an acre and more than one hundred bushels of oats.

"Some years ago," he said, "when I got my first alfalfa crop, it was marked well. But for a dozen years I have not raised less than one hundred bushels. One year I averaged one hundred and sixteen bushels on one hundred and sixty acres."

"Most of Mr. O'Donnell's neighbors are very well satisfied if they can raise fifty bushels of oats and thirty bushels of wheat to the acre. They do just as much work on their soil as he does and it costs them just as much to do the work per acre, but they haven't learned that the real profit comes only after a certain amount—enough to pay costs of operation—has been secured. Mr. O'Donnell realized years ago that he must build up his soil; furthermore, he realized that the cheapest way to do that was to keep it covered, and feed everything that was grown. He does not quite put out his principle, however, but sells sugar beets and some wheat, and all the alfalfa and small grains, aside from a portion of wheat, are fed and all the straw is saved and used to bed the stock and to make manure. The manure he built up the soil and has made possible the large yields and the profits."

"In the early years, when he moved onto the place, he fed sheep for the ranchers, generally 15,000 to 20,000 head. He was a very successful sheep raiser. He said: 'Many of my neighbors used to brag about getting more sheep to the acre than I did. But my alfalfa, but I never received less than fifty dollars. I fed all I raised and I had the manure to put on my fields, which enabled me to raise more.'"

The necessity of this article in the "Country Gentleman" found a great many things of interest about Mr. O'Donnell's farm that are not found on many other places. "When we were visiting the farm," he said, "I found a great pile of wood that had just been cut for firewood. There must have been twenty-five or thirty cords."

"Do you raise your own wood?" was asked. I knew it was originally a prairie and that any wood must have been grown.

"Yes," Mr. O'Donnell answered. "We cut a few trees every year, and we cut those that are old enough to make good wood. The oak makes the best firewood. The locust, the great many of the new trees were of the same size as the old ones. They were thoroughly cultivated and managed like a nursery."

I have sold more than \$1,000 worth of trees from this lot," my host told me. "Most of them were sold in Billings and to the lumbermen. I know what I need on my own planting along the roadside and enough for wood."

Beyond the trees, let us come to the seed plots. Like the good farmer Mr. O'Donnell has a large seed plot testing out new varieties of grains and forage crops. He has been trying out several varieties of millet, Sudan grass, Johnson grass and sunflowers. The later give promise of becoming the principal forage crop of Montana, if not of all the high mountain valleys and those sections of the country.

Mr. O'Donnell was one of the very first farmers in Montana to experiment with the raising of alfalfa, and was raising alfalfa in quantity and making money long before most of the other farmers even knew what it looked like. As early as 1895 he began to raise alfalfa, and he has been raising it ever since. He has been working with the institute staff spread over the country.

The St. Catherine's Chamber of Commerce has launched a scheme to have the Dominion put prominent name signs on every post office in the country so that tourists passing thro' will know what place it is. There is nothing more annoying than to wheel by some building and to afterwards find that it was the central business section of Mount Smithville or Calve Corners or something like that.

A body of eminent French scientists made the finding that the best way for women to retain good general health and balance of brain power is to perform household work regularly. It's a safe bet that some of those who have been called on to supplement for the hired maid.

TELEGRAPHIC NEWS

ALLIES MAY GRANT MORATORIUM TO GERMANY ON REPARATIONS

THE HAGUE, July 10.—Russia is ready to grant concessions for new railroad lines for four million hectares of land (9,800,000 acres) for agricultural use, it was announced by the Russian delegation here today.

PARIS, July 11.—A moratorium on Germany's cash payments for the remainder of this year was thought in circles close to the reparations commission to be quite probable as a result of a conference this morning between the British, French and German war debts commission, and all the members of the commission in a hurriedly-called informal session.

France to Stay at The Hague
PARIS, July 11.—France has decided to keep its representatives at The Hague until the end of the conference on Russian affairs there, it was announced in official circles today.

Poincaré Will Confer With Lloyd George
LONDON, July 11.—Premier Poincaré will probably be invited to London immediately for discussions with Premier Lloyd George on the reparations question affected by present conditions in Germany, according to official circles here.

Rumors Fly
THE HAGUE, July 10.—Rumors regarding probable moves by various members of the delegations at the conference on Russian affairs here are at this time of great interest. There is little reason to believe, says the official press, that France intends to break away from the official circles today.

"In the early years, when he moved onto the place, he fed sheep for the ranchers, generally 15,000 to 20,000 head. He was a very successful sheep raiser. He said: 'Many of my neighbors used to brag about getting more sheep to the acre than I did. But my alfalfa, but I never received less than fifty dollars. I fed all I raised and I had the manure to put on my fields, which enabled me to raise more.'"

The necessity of this article in the "Country Gentleman" found a great many things of interest about Mr. O'Donnell's farm that are not found on many other places. "When we were visiting the farm," he said, "I found a great pile of wood that had just been cut for firewood. There must have been twenty-five or thirty cords."

"Do you raise your own wood?" was asked. I knew it was originally a prairie and that any wood must have been grown.

"Yes," Mr. O'Donnell answered. "We cut a few trees every year, and we cut those that are old enough to make good wood. The oak makes the best firewood. The locust, the great many of the new trees were of the same size as the old ones. They were thoroughly cultivated and managed like a nursery."

The Tobacco of Quality

expressed the reparations situation and it was the opinion of the U. S. A., in an address "the wheat board" given before the members of the board of trade on Thursday.

"The price of wheat will never be stabilized unless such a board is established," he said. "The price of wheat is unstable because the flow of wheat to the market, and consequently the price, is unstable."

"Let me say to you that while it may be said that the wheat board is not yet organized, it is certainly known how to purchase wheat. They learned something, too, during the war. We on the other hand, did not learn anything, and consequently have nothing to report," the speaker remarked.

The appointment of a government wheat board did not meet with the approval of the speaker.

OTTAWA, July 6.—Until two years ago the Canadian wheat growers' associations decide what they are going to do in the matter of passing control of the wheat market to the Canadian wheat board act giving such a board control of the purchase and export of all wheat within their respective provincial boundaries no further action can be taken by the federal government. It was stated today at the department of trade and commerce that the wheat board, a federal government in respect to this matter, is pursuing a policy of watchful waiting.

H. W. Wood's View
CALGARY, July 6.—Only through the establishment of a compulsory wheat board, preferably one operated by the three western provinces, could the farmers ever hope to get a fair price for their grain, was the opinion expressed here today.

There's some of us has this world's goods,
An' some of us has none—
But all of us has got the woods,
An' all of us has got the sun,
So, settin' here upon the stoop,
This patch o' pine beside,
I never care a single whoop—
For I am satisfied.

Now, take the pine on pender hill,
It'll be long before it'll grow,
The boss he owns the timber—still
I never care for me to grow,
An' I'm smilin' at the same,
Twist the crown of the same game,
An' so I'm feelin' well.

The boss in town he's finger lands
An' he's got the pine on pender hill,
Lord! I just set with folded hands
An' breathe 'em in instead.

The boss his forest wealth he kin read
In cent and dollar sign;
His name is written in the deed—
But all his land is mine.
There's some of us has this world's goods,
An' some of us has none—
But all of us has got the woods,
An' all of us has got the sun,
So, settin' here upon the stoop,
This patch o' pine beside,
I never care a single whoop—
For I am satisfied.

THE GERMAN PEOPLE'S PARTY'S POLICY

Berlin, July 10.—The central committee of the German People's Party, which was held in Berlin, Germany, the capitalist, is so prominently identified, passed at a meeting Sunday a resolution which, the radical wing of the movement yet made in favor of the republic by the party's.

The resolution reads: "We are convinced that the reconstruction of Germany is only possible on the basis of a republican constitution. We therefore agree with legislation for the present constitution if the people's demand from the government that maintenance of authority."

The clerical and social democratic parties, which have been making a joint appeal to the German People's Party, inviting it to enter the government, have been disappointed. The resolution, which was passed, is a favorable response could be forthcoming, particularly the independent Socialists, the radical wing of the Socialist group should enter the government as seemed probable.

EDMONTON, July 7.—The co-operation of the Dominion government's immigration and colonization service in the irrigation land settlement scheme about to be launched by the Alberta government, was promised. L. C. Charlesworth, chairman of the irrigation committee, who has returned from Ottawa, where he went into the matter with the federal agent, said that the federal government is prepared to give such assistance as may be possible in the carrying out of the project at Great Falls and San Francisco.

Under this co-operative agreement the offices of the Dominion department at Great Falls and San Francisco will be at the disposal of the provincial organization as centres from which colonization work may be carried on in the western states. Literature descriptive of the Alberta lands will be sent out from these offices, and prospective settlers will be in as many contacts as possible to interview in person.

South Macleod Irrigation Notes

Up to the present approximately 22,000 acres of land within the South Macleod Irrigation Project have been listed for sale with the secretary. This, together with other large acreages which the owners are able to carry, together with holdings of 160 acres or less, accounts for nearly all the lands within the boundaries of the irrigation district.

It cannot be expected that purchasers can be found for these lands until some assurance can be given that they are really to be irrigated. Efforts are being made to impress this on the government, also that relief work is urgently needed by many of the farmers in the district. Undoubtedly the recent rains have done an immense amount of good, but there are parts where the crop acreage is small, and considerable burning had also taken place before the coming of the rain; added to this, there was still the menace of grasshoppers and the fact that credit has been severely strained for relief in the past. It has been by strenuous and continued effort only that the affairs of the irrigation district have been brought to their present state and if the work is to be carried on there must be no relaxing of this effort.

Convictions Under The Liquor Act

During the past week Chief Ridley garnered into Magistrate Siedman's court several offenders against the Liquor Act, aggregate fines imposed amounted to \$250.00.

Plaskett Star Is New Heavenly Body

The following story of the discovery of a new star will evoke considerable interest by reason of the fact that the discoverer, Dr. Plaskett, is a brother of R. Plaskett, well known rancher, formerly of Spring Point.

A new star has been discovered, and it has taken ten thousand years for the light of this star to reach the earth, says the London Daily Express.

It is called the Plaskett, after Dr. Plaskett, of the Dominion Observatory of Victoria, B.C., who made the discovery.

The Plaskett is 52,500 million millions of miles from the earth, and an aeroplane travelling at 200 miles per hour would take 30,000 years to reach this star.

In its distance from the earth lies our safety, because being more than five times larger than any other known heavenly body and 160 times more massive than the sun, the light it emits and the heat it generates would would instantly shroud the earth into ashes if it were in the position occupied by Mars.

The Plaskett belongs to that class of star known as the early type—a double star each revolving round a common centre of gravity. Its immense size may be gathered from the fact that these twin bodies take over fourteen days to revolve round each other at a distance of seventy million miles apart. Their density is believed to be one-hundredth that of water.

Scientists are unable to say when these vast bodies of vapour came into existence.

Speaking of the Plaskett star, a noted astronomer says: "It must have twined like a diamond in the sky, aens and aens before man's first ancestor walked the earth."

"In comparison with such a period of existence, man's allotted span of three-score years had ten paces quicker than a flash of lightning."

Dr. Plaskett's discovery opens up new conceptions of time and space, and shows that the depths of the heavens still hold undiscovered wonders which science has yet to bring to light.

School Fair Dates

The following are the dates selected for the School Fairs under the supervision of the School of Agriculture, Carleton Place, Alberta:

Macleod, Wednesday, Sept. 6.
Cowley, Friday, Sept. 8.
Gramm, Tuesday, Sept. 12.
Clareholm, Wednesday, Sept. 13.
High River, Thursday, Sept. 14.
Fischer Creek, Friday, Sept. 15.
Footville, Thursday, Sept. 21.
Stavely, Tuesday, Sept. 19.
Okotoks, Wednesday, Sept. 20.
Cayley, Friday, Sept. 22.
Baron, Tuesday, Sept. 26.
Champion, Wednesday, Sept. 27.
Vulcan, Thursday, Sept. 28.
Blackie, Friday, Sept. 29.
Parkland, Tuesday, Oct. 3.
Carmangay, Wednesday, Oct. 4.

At the funeral of a colored man, who hadn't been all that he should have been, an opportunity was given to his friends to say a word. A brother arose, and said: "We all hope that Brother Ephraim is where we think he ain't."

After the sweet young things had showered mother with flowers on Mother's Day, father found himself showered with bills to pay for the same.

The late Richard Croker has been buried on his Irish estate. Under the circumstances he is taking a chance.

IN WINTER TIME

WE EXPECT MORE OR LESS

To stick to the blankets (we do we confess) But in Spring or in Autumn, with oodles to do— With each minute counting, and minutes so few,

Perhaps its entrancing to wake up at three, Roll over and murmur, "There's more sleep for me." Yet wouldn't you rather you got your full rest— Depend on your timepiece, wake up full of zest.

We might string this out indefinitely but this is enough for one winding.

The point is, we have a fine line of Alarm Clocks, including the Westclox. Our prices are as low as you can buy them anywhere. They are worth repairing when in need of it.

MACLEOD MOTOR SALES

PHONE 85 MACLEOD, ALBERTA F. A. ADAMS, MANAGER

In a recent issue of The Macleod Times the following item appeared in the local columns:

"Are the Mounted Police needed in the country? It would appear so. Read on! Muskrat and Tom Undermorse, Blood Indians, are in jail at Carleton awaiting their preliminary hearing on a horse stealing charge, two other Indians also being implicated. Three horses were stolen from Glenwoodville farmers some three months ago. The culprits were arrested near Browning, Montana, and were brought back to Canada by Const. Marjorisen and Stock Detective Shaw. The losses of Glenwood farmers have not been confined to stock, grain and other articles also being taken."

The foregoing item, which might be termed news-editorial, was written and contributed by outside talent, and as occasionally happens, got through the different departments of this paper and into print without catching the editorial eye.

As appears on careful perusal it is not in the nature of a strong logical arraignment of the Alberta Provincial Police and would be entirely incorrect but for the first sentence—in fact, had the copy come under editorial censorship as written it would have been relegated to the waste-paper basket as piffle and re-written—especially in view of the fact that the editor of The Times had knowledge that the officers mentioned were members of the A.P.P.—the activity of whom in the matter was a logical contradiction of the tenor of this objectionable bit of print.

The Times admires and respects the Mounted Police on account of their efficiency as a body covering many years of service in the west as well as for the personal bravery and devotion to duty of its individual members as shown by the annals of the service—many outstanding instances of which are household traditions in Western Canada; but—The Times also admires and respects the Alberta Provincial Police as a most efficient organization in support of enforcement of law and order in this province, and around whom will doubtless also eventually hover a romantic aura attendant on apprehended traditional records of individual intrepidity in performance of duty.

Local Police Court News

Chief of Police Ridley executed a clever arrest and seizure under the Liquor Act last Friday night. Ed. Abdalar, hailing from Elko, B.C., with a supply of whiskey was arrested on arrival of the east-bound night express and he and his whiskey appeared before Magistrate Stedman next morning when Abdalar contributed \$200.00 to the coffers of the town and left his whiskey in the possession of the court. In the afternoon a Macleod man was before the magistrate as being the recipient of the same whiskey or more of it and subsequently contributed fifty dollars more by way of fine imposed.

Allenfields News

At the sports held in Allenfields on the 1st instapt, the Ardenville baseball team were the victors in the game played on that date. The prize, which was a baseball bat, and which was donated by the Cunningham Hardware Company of Macleod, was won by that team.

In a recent storm which passed over this district, and during which the lightning was unusually severe a valuable work horse, the property of Hetherington Brothers, was killed by lightning. The loss is a heavy one.

The grasshoppers are not doing any noticeable damage to the crops in this neighborhood. Quite a number were seen on alfalfa stubble but they were soon disposed of. Farmers, however, are still putting out the poisoned bait, determined to continue the war on the insects as long as there is any danger from their inroads.

Just before he died a New York man made a will composed of four lines of verse. It would be a great comfort all round if most would be poets confined their effusions to a like situation.

THE BREAK O' DAWN.

What mystery in the rising of the sun?
Golden clouds, floating, one by one,
Over the sky;
The East adown with every jewel known,
Over the fields the scent of apple-blossoms blown,
And the morning-star on high,
What beauty in the breaking of the day?
Ivory mists of dawn rolling away,
Silent and fleet;
The stir of waking life in woodland glade,
The sparkling dew on every waving blade,
And opening flower so sweet,
What music in the early morning light!
Caroling birds in blooming orchards white,
Or tinkling waterfalls;
The tale washing in the dark rock caves,
The ever-haunting melody of tossing waves,
And dawn reigns over all.

REACH & Co.

DRY GOODS, BOOTS, SHOES
GROCERIES, Etc.

Last week we had an exceptionally large shipment of fruits and salad vegetables, and preserving strawberries. Yet everything went off like butter in the sun. This week raspberries will be in—only a few will come in from time to time which would be advisable to order early so that you may be guaranteed in getting your supply. Telephone to us and we will protect you—in fact we are a little more particular on phone orders, for when you buy yourself you can take care of your own orders. In ordering by phone it is up to us to protect you and send the best. Strawberries are already gone, although a limited quantity will come in from time to time.

On Dry Goods, Boots and Shoes, etc., we are dividing our profits with you. It is impossible for a merchant to make the old-time percentage. If he can live and pay his way till another harvest it is all he can expect.

White Wear is cheaper than last year—prints and ginghams are getting cheaper. Any mother can make her own and her children's dresses with the help of the Butterick Patterns on sale in our store.

LOCAL & PERSONAL

Ernie Haug, of Waterton Lakes, is a visitor in town.

Miss Ivy Desell, of Cranbrook, is visiting Miss Jean Russell.

Quite a number of townspeople took in the Open Creek races.

H. Hession, spent a few days last week visiting friends in Cranbrook, B. C.

George Scheer, who is on the Lethbridge Herald staff, was in town the early part of the week.

Mrs. J. T. Faunt returned on Tuesday of this week after spending some time holidaying at Banff.

Mr. and Mrs. J. Lochead are leaving for the coast early next week to be absent for some weeks.

Mr. and Mrs. Hensley, of Vainhall, were week-end visitors at Macleod, the guests of Mrs. George Parker.

Mr. and Mrs. R. R. Coffey and daughter Edith left town yesterday to spend the summer holiday at Waterton Lakes.

R. F. Barnes, after spending a few days in the hospital with a sprained ankle, is recovering and able to walk once more.

Cluny Macdonell, an old Macleod boy, now of Calgary, is visiting with friends in town. He made the trip south by motorcycle.

The U. F. A. Co-operative Store, which has been doing business in Macleod for several years, has suspended operations for the time being.

Mrs. C. D. T. Becher, after spending a short holiday with her daughter Mrs. J. B. Wilson in Blainmore, returned to Macleod on Thursday last.

Tom Holstead, who has been holding down a case on the Coleman Jugg, for some months has returned to Macleod, his job having petered out.

The return baseball match played between the Macleod and Lethbridge teams at Lethbridge on Monday last, resulted in a win for the Macleod team by a score of 9-2.

E. E. Bradshaw, who went east a short time ago to consult a noted specialist returned to Macleod last week. He is now undergoing a course of radium treatment at the Calgary General Hospital.

Fred Clarke and wife, formerly of Macleod, but now residents of Macleod, Ontario, were in town this week, the guests of Mr. and Mrs. W. Charlton. Mr. Clarke, who has been to the Coast attending a convention of police officials held in the city of Victoria, is well known to Macleod people, having for a number of years been a member of the firm of Clarke Bros.

Specials in Fancy China

This week we have placed some of our finest pieces of China in our window. Prices are marked plainly on cards and all are reduced to the point where you will say they are cheap for such goods. Take advantage of these prices.

John T. Doney
JEWELLER AND OPTICIAN

publishers of "The Advance" They return east on Friday.

The Empire Hotel is being treated to a fresh coat of paint.

Mr. and Mrs. J. W. MacDonald left for Seattle yesterday.

Mrs. H. L. Waterson and two children left on Saturday for Ottawa.

Mr. R. Dean left on Tuesday for Vancouver and other Coast points.

W. V. Price and wife returned from Vancouver on Friday of last week.

Master Willie and Dick Parker are spending their holidays with Mrs. Hensley at the Big Bow.

Mrs. C. W. MacKinnon and daughter Grace passed through Macleod yesterday on their way to Calgary.

The regular meeting of the hospital board was held on Monday evening last. The ordinary routine of business was gone through with.

Mrs. A. Young, Miss Olive and Jeffery, and Miss Ford, look in the Calgary Fair, and are now visiting with Mrs. Young's parents at Crossfield, Alta.

J. W. Ryan and daughter June left for Ottawa, Ontario, on Thursday of last week, to be absent some weeks revisiting the scenes of Johnny's early boyhood days. Tarrytown is bound to look good to him.

Mr. and Mrs. J. Shannon, who arrived here early in the spring from Long Beach, Cal., passed through town on Wednesday to spend the summer holidays at Waterton Lakes. Mr. Shannon is an old stager in Macleod, having lived here as long ago as 1882.

Miss Lilian Becher returned to Macleod on Monday last, after spending a delightful week at the fair in Calgary with Miss Kathleen Proctor. Lilian was on her return from St. Margaret's School, Victoria. She will spend the summer in Macleod.

It is hoped that the northern members of the provincial parliament and also the pressmen will be enabled to visit the Macleod district during their tour of the south country. The party, which will be about fifty strong, will leave the north about the middle of the present month.

Mrs. C. Junket, of Fernie, B.C., and daughter, with her mother Mrs. Burdick, of Yorkton, Sask., visited Mr. B. W. Russell Friday and Saturday, motoring through from Fernie to Lethbridge. Mrs. Junket is the wife of Inspector Junket, commanding the R.C.M.P. at Lethbridge.

The government military plant at this point is now turning out large quantities of poisoned bait for the grasshopper extinction campaign. Large supplies of the materials required have been received, recently but occasionally the plant is held up for hours at a time owing to a shortage of one or more of the materials used, which is regrettable.

At the recent horse show held at Toronto the spectators were treated to some of the finest riding and high jumpers, three of the animals cleared a five-foot eight barrier. Among the riders, and the horses were Comet, Two Crow and Murray. Glenavon, an exhibit of Sir Clifford Sifton, balked at the five foot barrier. The height jumped is not, of course, the highest on record.

Joseph Ritson, of Clifton, Queensland, is visiting with his cousin, Mr. Jos. Shields, of the Ridge. Mr. Ritson is a farmer on the well-known Darling Downs, and is making a tour of Canada. He has already visited British Columbia, where he spent a month. When his tour is over he will spend the winter in his old home in England. Mr. Ritson is very much impressed with Canada and her people.

All the condemned articles left in the Q. M. Store, Macleod, and the property of the R.C.M.P. Police, are to be handed over to the Indian Department for the use of the Indian wards of the government. The stores consist of blankets, clothes, stoves, saddles, cooking utensils, etc., and all these things will be distributed to the Indians with the next couple of weeks. Much of this condemned stuff has been held in the stores here for a considerable length of time, and is now being disposed of in about the only way it could be made useful.

The public is requested to bear in mind the Banking Institution which has been instituted by the Alberta Government. Prof. D. A. McGibbon, of the Department of Political Economy at the University of Alberta, has been appointed for this work and will hold sittings at Macleod on Friday July 21st, in the Town Hall, at 10:00 a.m. and 2:00 p.m. Any persons having complaints or suggestions to make are requested to attend. Farmers are specially invited.

On Tuesday evening last Miss Wilma Swinerton was held at an informal dance given in the Parish Hall of Christ Church, at which about sixty young people were present. Dancing was the feature of the evening and commenced at about half past eight and continued until half past eleven, when a dainty lunch was served. Miss Margaret Watson presided at the piano and was relieved for a while after lunch by Miss Dolly Genge and the hostess. Dancing was kept up until one o'clock in the morning, when the young people dispersed.

Fry's Seed Chocolate

RECIPE: Keep on hand a syrup made up of one half cup of FRY'S Baking Chocolate, one cup of sugar, one cup of warm water. Stir until smooth. Then boil for 5 minutes—chill and add one half teaspoonful of vanilla extract. To serve, allow two tablespoonfuls of this syrup to a glass with a little chopped ice, and fill with cold milk. Stir well.

Try this cooling, delightful FRY drink. You'll want it often.

FRY'S Cocoa may also be used as above.

expressing themselves as having enjoyed the evening immensely.

An article advising as to the proper time to feed grasshoppers appears in another column of this paper. It is from the pen of a Montana expert and should be of especial interest to our own farmers at this particular time.

Not for several years has the country been so thoroughly drenched as during the past two weeks. The rain was a little late in arriving, being due about the middle of June when, without a doubt, its benefits would have been more than doubled, but it has done an immense amount of good and has cheered the farming element wonderfully. In 1910 the delayed Jun rains fell about the middle of August too late to do much good that season.

Two parties of tourists from Saskatoon, and heading for Vancouver, B.C., passed through town on Tuesday. They had left Saskatoon early Sunday and had encountered heavy going for a considerable distance, the roads being heavy owing to excessive rains. Mr. and Mrs. A. Duckley Sampson, Mrs. C. E. Symons and Gordon Symons occupied the first car that pulled in, while Mr. and Mrs. H. S. Brown occupied the other. They are seasoned travellers and carried an up-to-date camping outfit. Mr. Brown was in Macleod twelve years ago and believes that with the completion of the irrigation project Macleod will become one of the best known places in the province.

Immense quantities of poisoned bait have been distributed over the fields growing grain in order that the grasshopper pest might be checked, and much good has undoubtedly been done. Many farmers, however, are said to have neglected the pasture lands which now harbor large numbers of the insects. It is a great pity the grass lands were not looked after more closely during the early life of the hoppers as almost a complete extermination could then have been effected. Now that the hoppers have reached the winged stage in their existence and are moving around much more rapidly, farmers fear that adjacent grain fields will suffer from their ravages. At this stage the insects do not appear to take so readily
